## IMPEY - AQUADEC

wet room showers for all lifestyles

The Impey Aqua-Dec is a complete system that has been designed to allow the simple and cost effective creation of a wet room shower.

#### GRADIANTS

All Aqua-Dec's have a 17mm gradient to the drainage point. This ensures water flows consistently to the gully providing the installer and user peace of mind when showering.

#### DRAINAGE

The Aqua-Dec comes complete with several drainage options. All of these gullies have a high quality stainless steel cover plate and are top accessible making cleaning and maintenance very simple. When gravity drainage is not an option, there are also pumped drainage systems available to remove waste water.

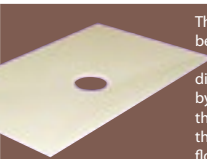

#### WATERPROOFING

Once the Aqua-Dec and gully are in place, Tilesafe® is installed, creating a highly efficient waterproof membrane.

## GRADIANTS

Our Price £

The Aqua-Dec has been designed to overcome the difficulties faced by the installer that manually form their own wet room floors.

The idea is to reduce the manual labour, provide consistent gradients with every installation and achieve a cost effective, robust and practical preformed wet room base. Peace of mind with the Impey 15 year warranty

## WASTE PUMP

Our Price £

Dry-Deck Pump Kit	DDW20	767.04
-------------------	-------	--------

## DRAINAGE

Our Price £

This drainage option has a stainless steel top and allows the Aqua-Dec to be tiled. Available with either a horizontal or vertical outlet shower trap. It can be used with most floor tiles between 6 and 16mm thick.

DSS1/H Depth 128mm	DSS1/H	124.58
DSS1/V Depth 215mm	DSS1/V	124.58

This drainage option has a stainless steel top and allows the Aqua-Dec to be tiled. It also allows the waste water to be pumped away when used with the Digital Pump.

DSS2 Depth 38mm	DSS2	108.97
-----------------	------	--------

This drainage option has a stainless steel top and allows the Aqua-Dec to be vinyled.

DSS3/H Depth 130mm	DSS3/H	95.76
--------------------	--------	-------

## WATERPROOFING

Our Price £

TILES SAFE is a cold-applied, self adhesive, waterproof membrane which consists of a thick rubberised waterproof layer, incorporating a woven glass

fibre mesh on one side. It has been developed for use prior to the application of ceramic tiles which are applied using a conventional adhesive which keys to mesh. As the adhesive dries it forms a strong permanent bond through the mesh and directly onto the waterproofing layer.

10m <sup>2</sup> Tilesafe kit	TS1	354.35
5m <sup>2</sup> Tilesafe kit	TS2	262.34
